## APPLICATION GUIDE

Black DAP™ is specifically targeted to improve profits on low fertility soils. Application in concert with sustainable farming practices such as incorporation and irrigation management will produce best results. Suitable for pre-sowing, top-side dressing by all means typical to granular and soluble fertilisers.

## STORAGE

It is generally recommended that fertiliser not be stored in silos. If it is necessary to store this fertiliser in silo, it should be for a short period of time only, i.e. temporary storage immediately prior to use.

## HEAVY METALS

Use of this product may result in Cadmium and/or Lead and/or Mercury residues in excess of the Maximum Permitted Concentration (MPC) in plant and animal products and may also result in accumulation of these residues in soils.

## CARE OF EQUIPMENT

This product can be corrosive to metals. Clean equipment after use, and follow manufacturers advice.
